

Company Profile

IntegraSys is a leading technology provider specializing in the development and implementation of Mobile Sales and Route Accounting systems. We offer a unique combination of solid Direct Store Delivery (DSD) business experience matched with a proven track record of successful system implementations across the United States including Hawaii. Our solutions can be implemented as stand alone systems or can be integrated to existing host, ERP solutions (such as SAP™ and Oracle™).

Our organization offers a unique combination of solid DSD business experience and excels at implementing creative, cost-effective solutions that leverage existing technology investments. Give us a call today to discuss your needs.

IntegraSys is proud to offer the premier route sales and accounting handheld computer system, **DSD Manager**. This complete, integrated package features an easy-to-use PC-based host along with a variety of ruggedized hand-held computers. It is designed to automate, streamline and improve all aspects of your route distribution business.

IntegraSys can put hand-held computers into the hands of your drivers (and independent operators) quickly and affordably. Whether your operation runs 1, 10, 100 or 1000 routes or uses owner/operators or sub-distributors, **DSD Manager** has the robustness to grow along with your business

IntegraSys can help you achieve peak Direct Store Delivery (DSD) operational efficiency, take excess cost out of your business and present a professional face to your customers and suppliers. Put the power of hand-held computers and our extensive DSD experience to work for you!
